Al Edari Engineering & Services W.L.L.

is a leading company in Qatar, specializing in Electro-Mechanical Trading, Contracting, and services. Our main goal is providing high-quality materials and systems to customers, while also implementing top-notch technical and engineering solutions that protect the environment.

www.aledari.qa

Al Edari Engineering & Services WLL

was born in 2007 with a vision to revolutionize Mechanical, Electrical, and Plumbing (MEP) works. It is effectively backed up by dedicated professional engineers combined with well-experienced staff & workforce.

Mission and Vision

We believe that the prosper and success of the business, can't be achieved without skilled and highly qualified staff and technicians. From day one till now, we have invest- ed in manpower resources with intensive training in all disciplines to grow business together.

We are proud to assure you that, with our wealth of knowledge and expertise staff, and technicians, we are always ready to achieve the required scope of work on time to satisfy our valued customers.

Resources

Top Management

The company was established by highly qualified Managers/Partners with an engineering background and long experience in the field of construction for strategic planning and decisions.

Middle Management

Engineers: Highly qualified and experienced Engineers represent the heads of the different divisions, UPDA and QCD certified to provide very high professional services and solutions.

Technicians, Skilled & Unskilled Workers

Technicians & Skilled: AC technicians, Electrical Technicians, Plumbers, Duct, fabricators, Electricians, and Welders.

Our Objectives:

- Provide competitive prices with high quality.
- Provide customer satisfaction always.
- Create and develop a healthy business environment for continual improvement.

Our Services

Trusted Mechanical Systems

Air Conditioning

Stay cool and comfortable, no matter the weather

Ventilation System

Ensure fresh air circulation in every environment

Precious Air conditioning

Designed to optimize cooling efficiency in any environment

Drainage

Efficient Drainage System for effective water management

Water Supply

Reliable Water Supply Solutions for uninterrupted flow

Fire Fighting

State-of-the-art systems to safeguard against fire emergencies.

Electrical And ELV Systems

Public Address & Voice Evacuation

Public Address

- Clear and effective communication solutions for public spaces

Voice Evacuation

- Clear and reliable voice evacuation systems for effective emergency communication

Security Systems

CCTV

- Advanced surveillance systems ensuring security and monitoring

Access Control

- Designed to provide robust security by managing & monitoring entry to your facilities

Substations

- Robust electrical substations for a resilient power supply.

Fire Alarm

- Early detection systems for prompt response to potential threats.

Lighting and Small Power

- Innovative lighting designs and efficient power solutions.

Data and Telecom

- Reliable connectivity for seamless communication

Mechanical and Electrical Installations

Surge Vessel Installations

Portable Pipe Installation

Midfield Bypass Line Installation

Network Elements Installation

Water Meter Installation

Vlideo Wall Screen Installation

Pay less for electricity with Variable Frequency Drives (VFDs)

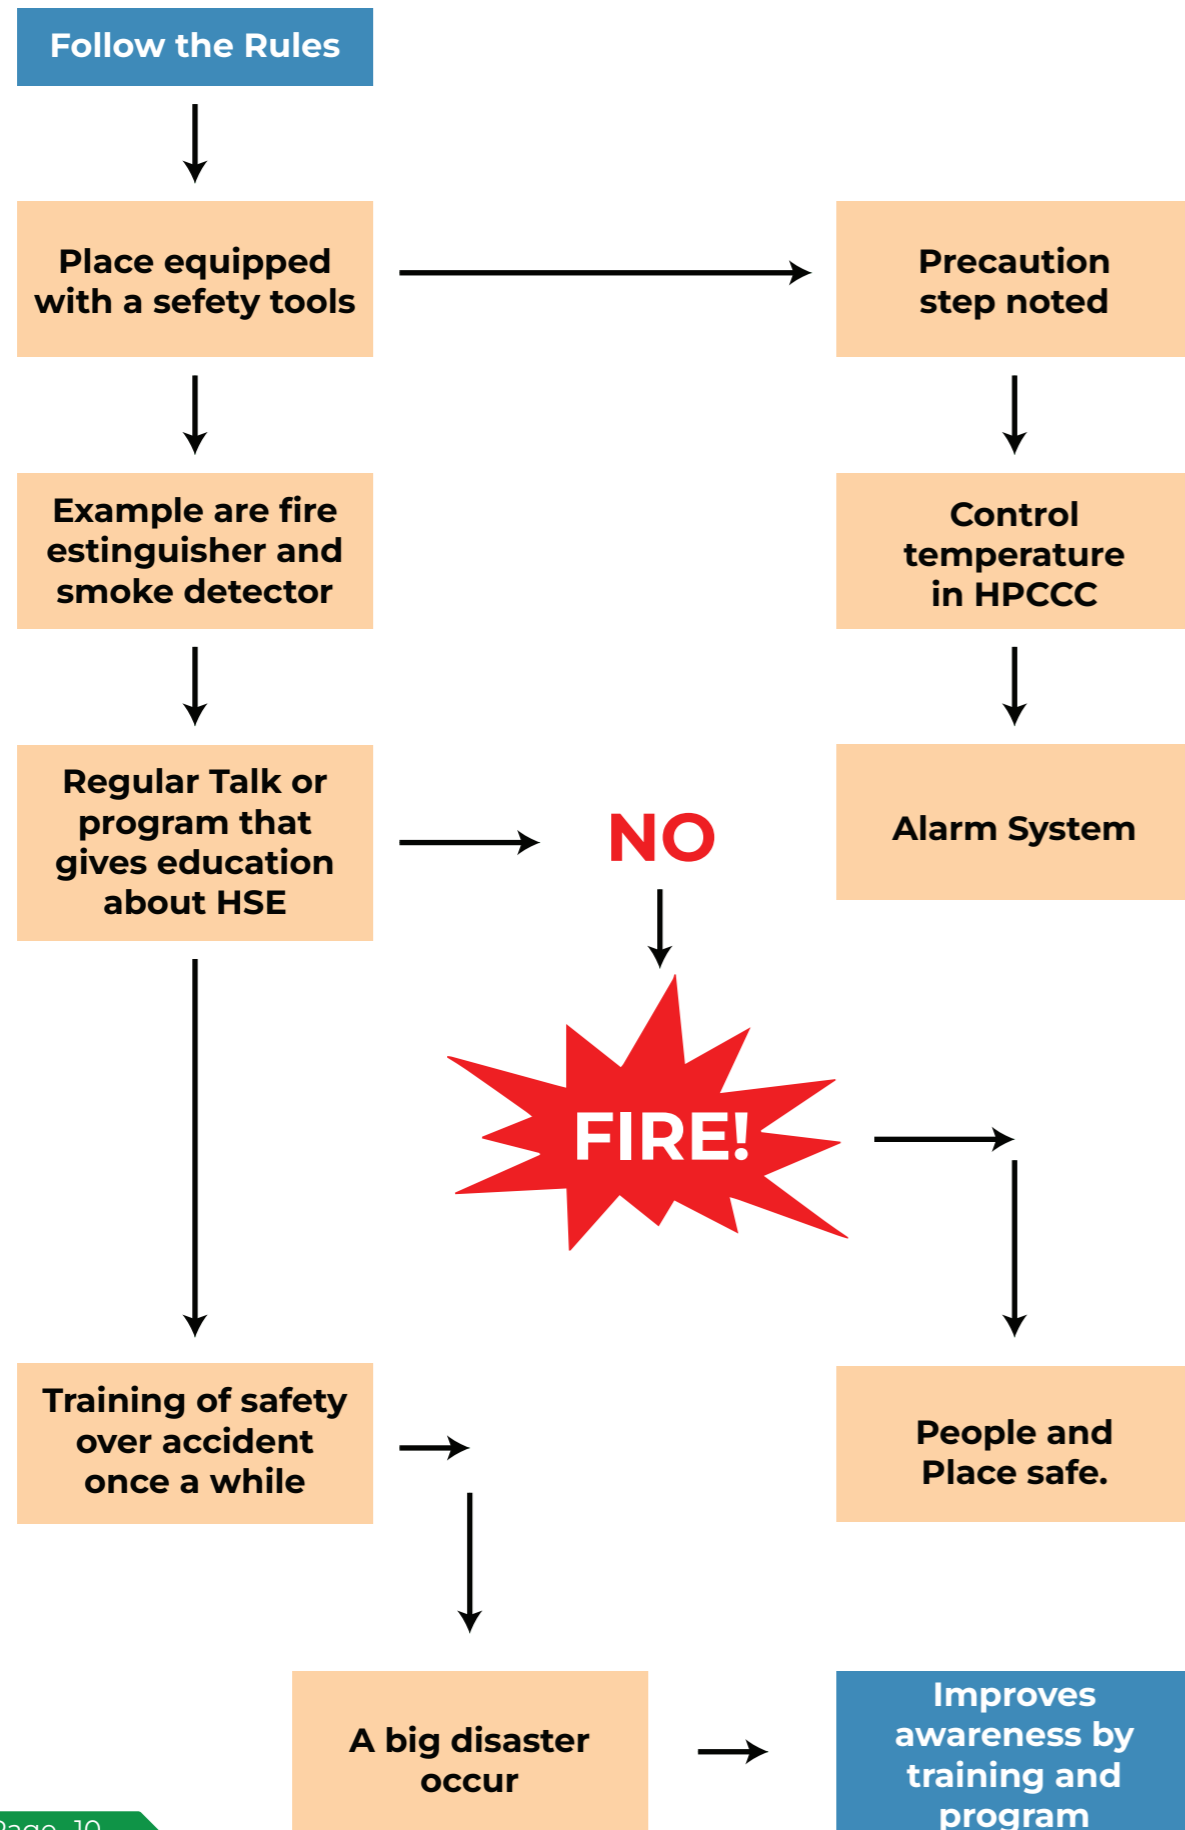

VFD devices regulate the speed of electric motors, allowing precise control over machinery. By optimizing performance, VFDs save energy and reduce wear and tear without sacrificing performance.

Ensure the safety of fluid systems with Surge Vessels

Essential in fluid systems, absorb pressure fluctuations to prevent damage and ensure smooth operation. Our surge vessels are engineered to the highest standards, providing reliable performance and safeguarding your system.

HSE Flow Chart

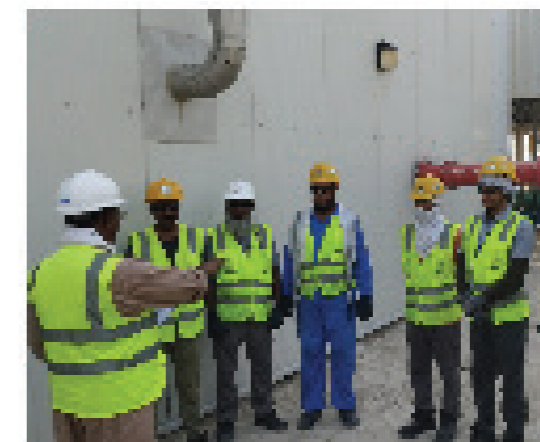

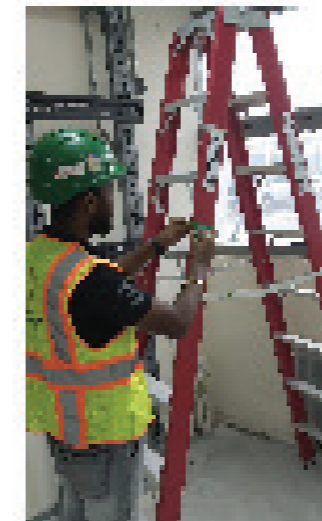

Health, Safety & Environment (HSE)

We're setting the standard for a safer workplace with our HSE procedures Our commitment to safety is evident through

- Various awareness classes
- Regular checkups, and
- Maintaining proper

housekeeping standards on all our project sites.

We take pride in our HSE achievements, ensuring that every project is executed with the highest safety standards.

Guaranteed peace of mind with Quality Control and Assurance

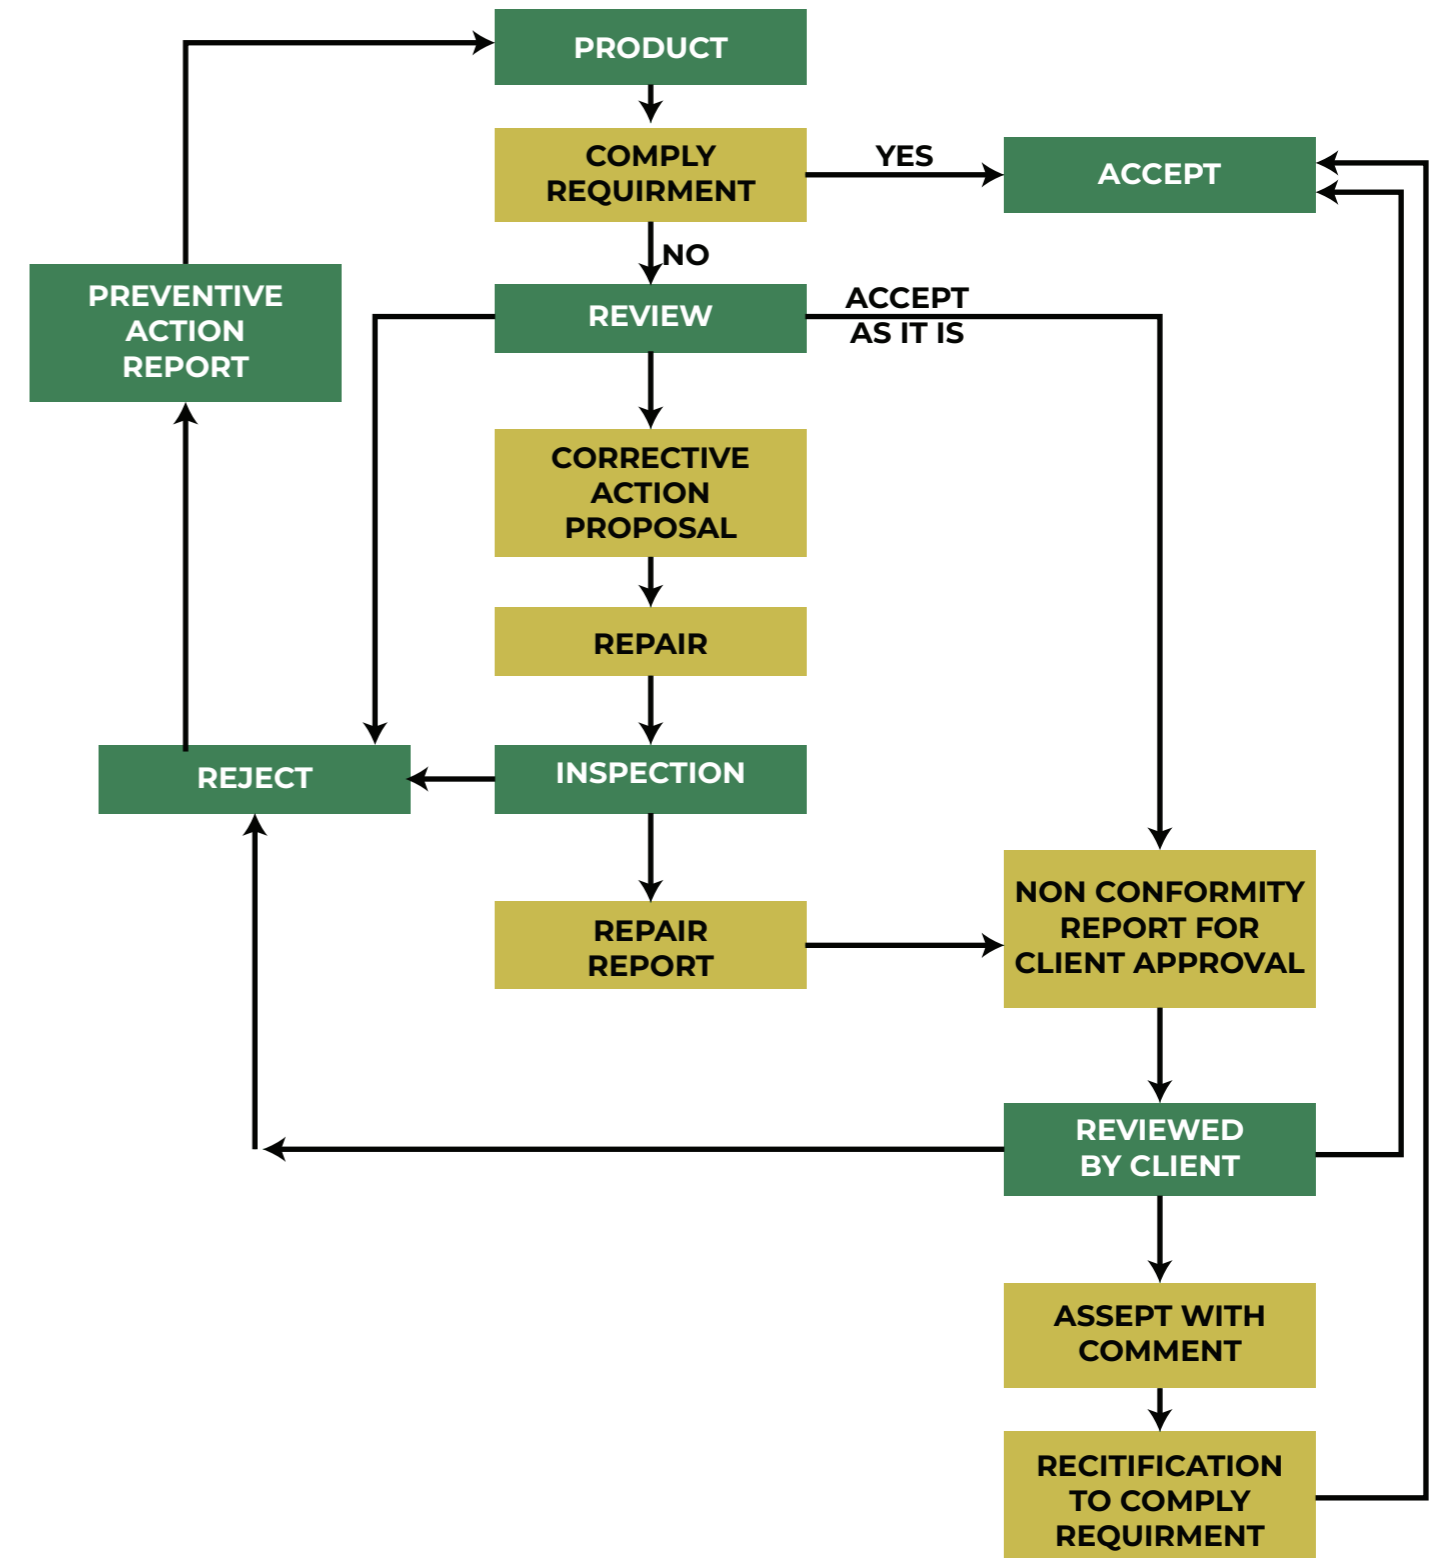

We have established the highest standard of excellence through rigorous quality control and assurance procedures, backed by our prestigious ISO certifications.

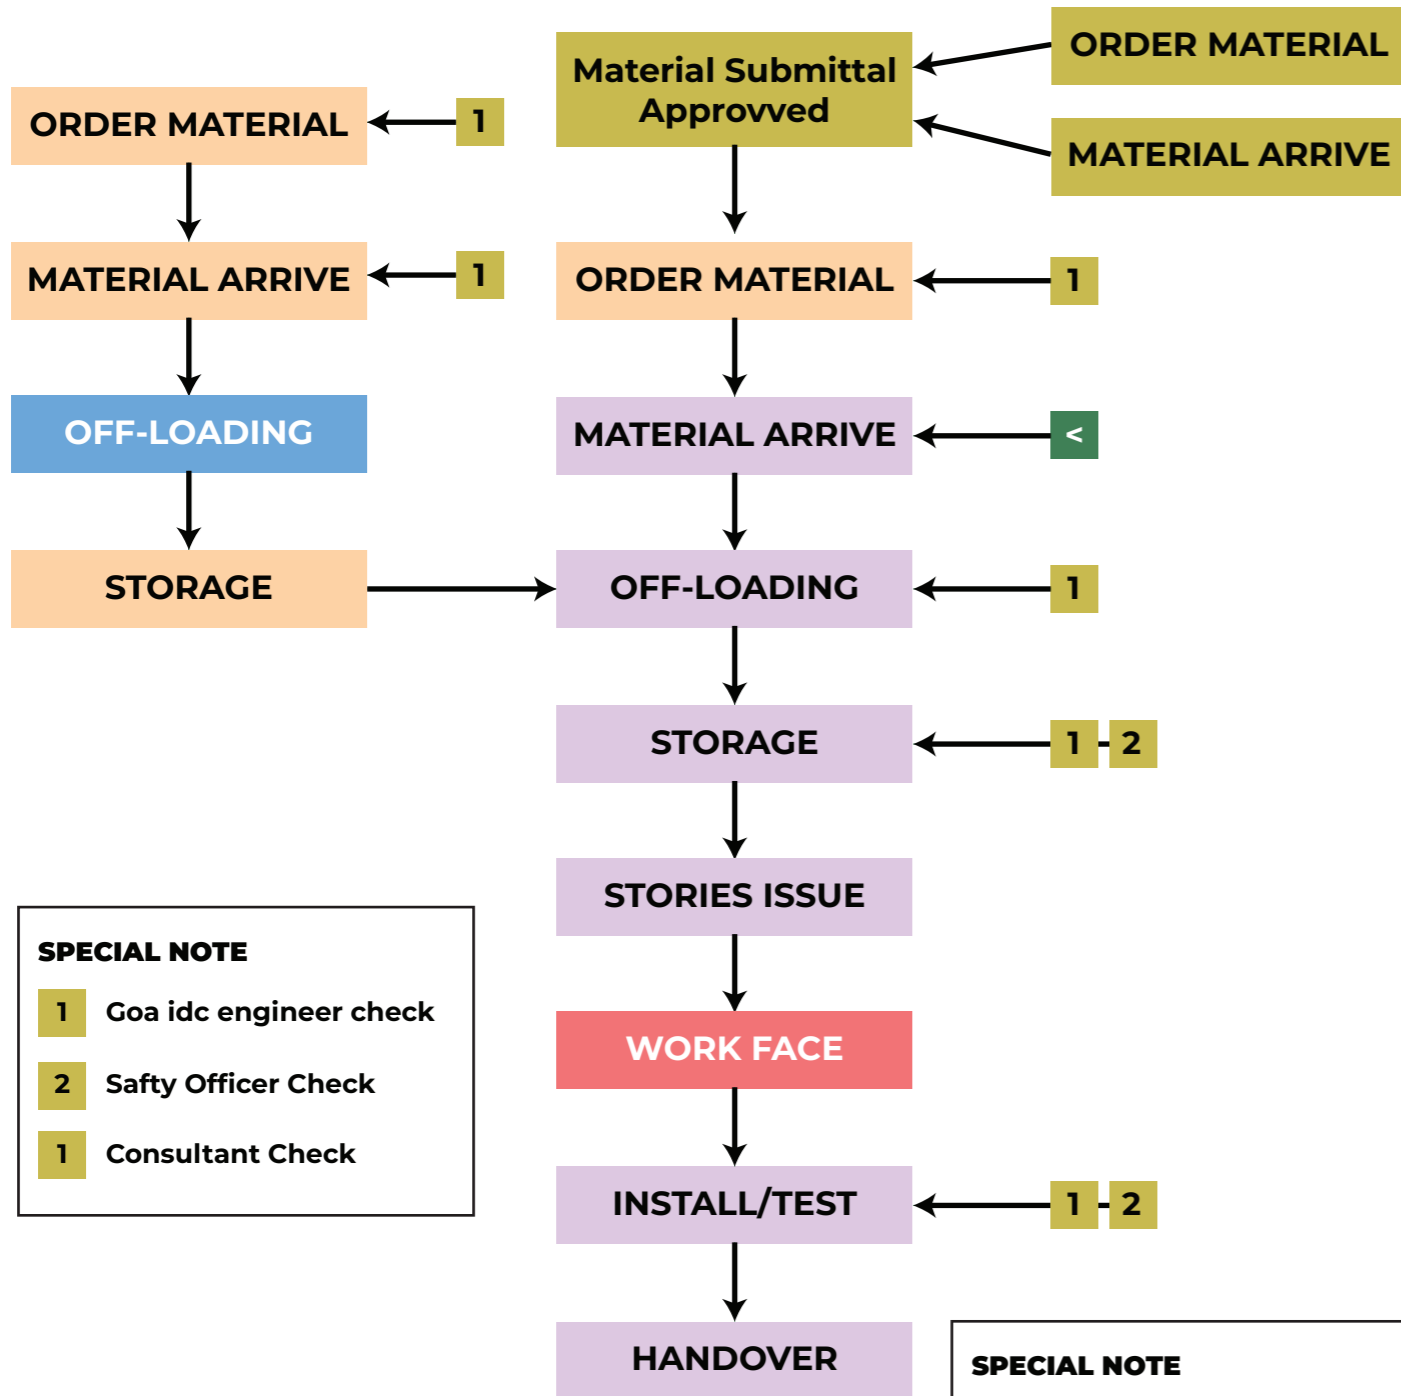

The QA/QC Responsibility

1. Ensure the quality system on site is maintained.
2. Inspect and ensure that all delivered materials and equipment on site are controlled and comply with project specifications.
3. Witness and sign all test forms as part of the start-up and commissioning.
4. Investigate the cause of non-conformity (if any) in the project quality plan.
5. Review the quality and workmanship standards and materials.
6. Ensure that the corrective action is taken.
7. Reporting to the main contractor Quality Manager.

- Paperwork
- Work Face

Our Recent Projects

Completed

Musheireb Phase 1 B

Beverly Hills 43 villas compound

Labor accomodation (Industrial Aera)

Qatar Kuwaty PVC windows Factory

Al Jazeera Tower (West Bay)

12 Villas Residential Compund

Ongoing

Hamad internatinal Airport

Eye Wash Facility at Navel Base Project

Cargo Terminal - HIA

Awards

Nominated for MEP Awards Middle East 2024

Engineers Australia Qatar Chapter Appreciation

Our Legal Certifications

- Kahramaa Grade A Contractor

- QCDD Approved

- ISO Certification 45001:2018, 9001:2015, 14001:2015

- Qatar CR No. 12-4951-00 and Chamber of Commerce registered

Appreciation certificates from Clients and Staff appreciation
